EQUIPMENT INSPECTION

MACHINE	SERIAL NUMBER	INSPECTION GRADE
Injection Molder	SGMM-12345	PASS

INSPECTION SUMMARY
Following a thorough inspection of the injection molder, no issues or concerns were found. The technician meticulously examined the machine's components and operating systems, ensuring they were all in proper working order. Additionally, the safety measures underwent a comprehensive assessment and were determined to be fully compliant with standards, functioning effectively. As a preventive measure, the technician recommended regular maintenance to sustain the machine's excellent condition for future production runs. Overall, the inspection confirmed that the machine was operating optimally, meeting safety regulations, and ready for immediate use.
