## EQUIPMENT INSPECTION

MACHINE	SERIAL NUMBER	INSPECTION DATE
Injection Molder	SGMM-12345	PASS

INSPECTION SUMMARY
The inspection of the injection molder concluded with no reported issues or concerns. The technician conducted a thorough assessment of the machine's components and operating systems, confirming that all systems were functioning correctly. Additionally, safety measures were examined and found to be fully operational and compliant with standards. The technician advised regular maintenance as a preventative measure to keep the machine in top condition for future production runs. Overall, the inspection indicated that the machine was operating optimally, meeting safety regulations, and ready for use.

Injection Unit	Good	✓
Mold Clamping Unit	Good	✓
Hydraulic System	Good	✓
Temperature Control System	Good	✓
Ejector System	Good	✓
Lubrication System	Good	✓
Safety Devices	Good	✓
Control Software	Good	✓
