## EQUIPMENT INSPECTION

MACHINE	SERIAL NUMBER	INSPECTION GRADE
Injection Molder	SGMM-12345	PASS

INSPECTION SUMMARY
The inspection of the injection molder was conducted, and it yielded no reported issues or concerns. Performed a thorough assessment of the machine's components and operating systems, confirming their proper functionality. Furthermore, a comprehensive examination of the safety measures revealed their compliance with standards and effective operation. As a preventive measure, regular maintenance is advised to uphold the machine's excellent condition for future production runs. Overall, the inspection indicated that the machine was operating optimally, meeting safety regulations, and ready for immediate use.

Injection Unit	Good ✓
Mold Clamping Unit	Good ✓
Hydraulic System	Good ✓
Temperature Control System	Good ✓
Ejector System	Good ✓
Lubrication System	Good ✓
Safety Devices	Good ✓
Control Software	Good ✓
